

P6130

## P6130

Background Music - Amplifiers

A Monophonic amplifier of up to 8 w on a load of 2 Ohm. for connection to 4" passive loudspeakers. Direct connection for one loudspeaker, and connector for parallel connection of more loudspeakers. It is supplied as a separate unit to be directly attached to the loudspeaker's plastic support with the two screws and nuts included. This enables a variety of loudspeaker and power combinations (see attached table). The sound level of the amplifier can be controlled by the sensitivity adjustment potentiometer.

## **GENERAL FEATURES**

## **TECHNICAL CHARACTERISTICS**

Power: 8 W

Frequency Response: 75 Hz - 18 Khz

Sensitivity:1,5 VMains Input:16V DCMaximum Consumption:1 AStandby Consumption:54 mA

**Dimensions:** 83x43x24 mm

Weight: 40 g

## **INSTALLATION**
