2 WAY PASSIVE CABINET LOUDSPEAKER - P4739

Connection strip.

DESCRIPTION

The P4739 is a 2-way bass reflex loudspeaker, specially indicated for background music installations where a special quality level and power are needed.

GENERAL CHARACTERISTICS

- Two way acoustic box - Bass reflex
- Crossover
- 5" 1/4 bass speaker - 1" treble speaker .

It includes accessories for two possible locations:

A - Installation on a bookcase or similar. In this case, the foot support is used, which is screwed on the rear of the Baffle and keeps it in a vertical position. It can be fitted in two positions, providing two different angles to adapt it better to its location.

B - Installation on wall, by means of the wall support, which is screwed on the rear and means it can be hung from a hook. This support can be fitted in four different positions, being able to direct it correctly both vertically and horizontally.

CONNECTION

Before making the connection, make sure that the amplifier supplying the audio signal is off. After putting the baffles into place, prepare the cables according to desired measurement and make the connection.

TERMINALS:

RED : Input +

BLACK : Input -
